Sycliq Aqua Collagen Global Networks (SACGN)

Transforming Aquaculture Waste into 99% Pure, Blockchain-Verified Marine Collagen.

The Marine Collagen Market is Broken

Approx. 20 million tons[1]

Overall Fish Loss & Waste

Nearly 27% of global fish production is lost before reaching consumers.[2]

Cost to Extract

\$22 to \$28 per Kg

Market Selling Price

(Premium 99% Grade)

Gross Margin :55% to 70%

1 -<https://www.springerprofessional.de/en/fish-waste-to-valuable-products/26744538>

2-<https://doi.org/10.1002/csr.70008>

Premium Purity Meets Digital Governance

Premium quality marine collagen

An optimized, hybrid Acid-Pepsin extraction protocol yielding

99% pure Type I Marine Collagen from Tilapia, Carp, Cod, and Red Snapper scales.

Bioreactor

Hybrid acid-pepsin extraction protocol and the 99% pure Type I Marine collagen - bio processing

Sycliq IoT network

Track pH, temperature and transit time, purification cycles.

Sustainability

Turning a negative-cost waste stream into a high-value \$55/kg biomaterial

Strategic Value

DRAFT

Market Opportunity

A Rapidly expanding \$1.5B+ niche

PROJECTED MARKET SHARE

Go To Market Strategy

Premium Segment Focus

- Highest-margin segments: Cosmeceutical & Biomedicals
- Nutraceuticals and Food & Beverages.

Potential Geographic Markets

Primary markets (US, EU, Japan) represent 70% of total addressable market

Growth Potential

More than 50% growth potential across various segments, due to high demand.

The Solution

Lab-Validated Science, Automated & Industrialized

Return on Investments

Business Model

Four Revenue Streams for Maximum Resilience.

DRAFT

- Direct wholesale of pure, lab-verified marine collagen. High-ticket, purchase-order driven volume , revenue from the first production run
- Licensing the SycliQ IoT tracking dashboard to other marine bio processors and fisheries. High-margin, recurring monthly revenue that compounds with every license sold.

3Phase Roadmap

Go-to-Market

Lean Approach: De-risked Asset Light Scaling

DRAFT

Phase I (Month 1-3)

Micro-Pilot

Produce 10-20 Kg
“Golden Sample”

Third-party QA validation
Cost : ~15K

Phase 2 (Months 4-9)

Contract Manufacturing (CMO)

Rent idle capacity at existing
food-grade facilities

To fulfill initial LOIs

Zero heavy CAPEX

Phase 3 (Months 10-18)

Modular Scaling

Deploy containerized, skid-mounted extraction unit

Directly at partner fish processor's site.

Traction & Milestones

From Lab to LOI in 90 days

	30 Days Sourcing & Micro-Pilot Execution	60 Days QA/QC Validation & Digital Twin Setup	90 Days Buyer outreach & LOI Generation
Week 1	Finalize and sign waste-diversion MoUs with 2 aquaculture/fish processing facilities (Tilapia/Carp) for guaranteed zero-cost scale supply	Ship “Golden Sample” to accredited third-party labs (e.g., Eurofins, SGS) for comprehensive testings: HPLC (Type 1 Collagen profile, ICP-MS (Heavy metals), and microbial screening.	Build a targeted outreach list of 30 mid-tier premium buyers (Cosmeceuticals, Nutraceuticals, Biomedical) in the US, EU and Asia.
Week 2	Procure lab-scale equipment (centrifuge, pH meters) and food-grade chemicals (Acetic acid, NaOH, pepsin). Calibrate SycliQ IoT templeration/pH sensors for transit tracking	Deploy SycliQ Traceability Dashboard MVP. Input Batch 2 data to create the first “Digital Twin”, showcasing real-time pH, temperature logs, and chain-of-custody	Launch targeted email outreach to R&D and Procurement Heads, offering the Golden Sample +CoA+ SycliQ traceability demo.
Week 3	Execute Extraction Batch 1. Refinee the hybrid Acid-Pepsin porotocol (o5M acetic acid +0.1 pepsin at 4-10 degree c) to maximize yield and preserve the triple-helix structure	Receive and analyze third-party QA/QC reports. Address any minor process tweaks if purity is at 97-98% instead of the target 99%	Conduct 50-10 virtual discovery calls and product demonstrations. Ship physical Golden Samples to the top 5 most engaged prospects
Week 4	Execute Extraction Batch 2. The “Golden Sample”. Optimize Tangential Flow Filtration (UF/DF) and freeze-drying parameters to achieve target >95 purity.	Finalize the investor/nuyer package: 100g for Golden Sample powder, the official Lab Certificate of Analysis (CoA), and a live demo link to SycliQ batch tracker.	Negotiate terms and secure 2 to 3 non-binding letter of Intent (LOIs) for Phase 2 Contract Manufacturing (CMO) productions, specifying volume (e.g., 50-100Kg/Month) and target price (\$45-55/kg)
	Secure zero-cost raw materials and produce the first lab-validated batches	Prove the 99% purity claim with independent data and build the tech moat	Convert scientific validation into commercial commitment without building a factory

Data is only powerful when it works together. At β ORI Inc., we build end-to-end operating systems that unify spatial and aspatial data to solve complex business challenges. Unlike traditional consultancies. Our products are engineered by technology researchers who turn fragmented information into intelligent, real-time decision engines. From Strategy to execution. We don't just advise; we build the infrastructure that makes your business smarter, faster, and truly location-aware. Beta ORI: where deep science meets real-world impact.

DRAFT

Team & Advisors: Execution Expertise

DRAFT

Our success is driven by a deep bench of talent, combining decades of experience in water infrastructure, advanced desalination technology, logistics, and regional market navigation.

Awase Khirni Syed Ph.D.

Founder & CEO

- 15+ years in MENA water projects & entrepreneurship.
- Strong government relations and business development acumen.
- **Critical for: Strategic vision, market penetration, partnerships.**

Dr. Lena Khan

CTO & Chief Water Technician

- PhD in Desalination Engineering; 20+ years in RO system design.
- Specialist in optimizing mobile and energy-efficient desalination.
- **Critical for: Technical innovation, water quality assurance, system reliability.**

Mark Johnson

COO & Operations Lead

- 18 years managing complex logistics and remote operations.
- Proven track record in rapid deployment and field management.
- **Critical for: Efficient deployment, operational excellence, supply chain management.**

H.E. Abdulaziz AL-Ghaith

Senior Advisor

- Former Director, Ministry of Water Resources, KSA (30 years).
- Expert in GCC water policy, regulation, and large-scale infrastructure.
- **Critical for: Regulatory navigation, governmental relationships.**

Aisha Rahman

Strategic Advisor

- Former VP, Major EPC Firm (25 years in region).
- Deep understanding of industrial client needs and project execution.
- **Critical for: Market insight, client engagement, strategic partnerships.**
